

December 10, 2020 - GREAT NEWS!!!

Touch-free purchases have just gotten easier!

KCCU has increased your *MemberCard*® debit card tap limit to \$250 per transaction for safe, touchless payments.

Here is how to activate this change:

To activate this change, cardholders will be required to deliberately choose to insert card and PIN for 3 consecutive Point of Sale (POS) transactions. The transactions can be completed at different terminals, but they must be completed by inserting your card and entering your PIN to allow the new limits to take effect. If a contactless transaction is completed (you tapped your card), you will be prompted to insert your card and PIN. This will occur at least 3 (perhaps 4) times before your card has been reprogrammed. Also please note that it will take 24 hours, following the last insert, for the new limits to come into effect. Once this is done, you will be permitted to tap up to \$250 per transactions and \$400 cumulative.

With this increase on your ability to tap higher purchases, there is also an increase risk to your account should your card be lost or stolen. It is important that you contact us immediately to notify us and cancel your card should it be lost or stolen. For further security, please set up alerts on your account so that you are notified or potential unauthorized purchases.
